mean
95% interval
range over seeds
as drawn
(a) Mean transfer
(b) Thermal gain in transfer
As drawn
Random forest of the main text
Classifier and software
Random forest, depth 6, leaf 50
Random forest, leaf 200
Penalised logistic regression
Ten random-forest seeds (range)
scikit-learn 1.5.2 instead of 1.9.0
Predictors
Baseline and the two anomaly channels
Baseline and the four absolute channels
Coordinate-informed channels removed
Labels and land cover
Labels from VNP64A1
Land cover from WorldCover 2020
Cells burned in prior 5 years removed
Target cells, chosen without target labels
Inside the source's predictor range
Inside the source's area of applicability
20 km square at the study-area centre
Regions
Without Manavgat (12 directions)
