

Local skill does not travel

Evaluation geometry

Same model, scored on the burn scar and its 2 km collar instead of region-wide, costs

0.143 AUC

95% CI [0.077, 0.208]

Equal 10 km frames lift mean transfer 0.541 $\rightarrow$ 0.616; the static baseline transfers no better (0.537 vs 0.541 as drawn).

Measure transfer skill on the target region before relying on a model there.
